Subject: Types of Funding Utilized for Homeless Services

On December 16, 2003, the City Council requested information from the City Manager outlining the sources of funding for services to homeless persons. Please find below information regarding funding the City currently receives, and other sources of funding available to the City and nonprofit agencies, for assisting with defined services to homeless persons.

I. FUNDING CURRENTLY RECEIVED THROUGH DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT (HUD)

A. Continuum of Care Funding

The City accesses several sources of funding through the HUD Continuum of Care (CoC) process, in which the City acts as the coordinating body for these funds, but passes through 88% of the funding directly to nonprofit agencies serving the homeless in Long Beach. Attachment A provides a listing of all CoC funding by the City received since 1995.

The CoC funds are designed to allow homeless persons to live as independently as possible. Grants under the CoC are awarded through a national competitive RFP process held annually. The Department of Health and Human Services (DHHS) conducts a Request For Proposals (RFP) process, overseen by the Homeless Services Advisory Committee (HSAC) and the Board of Health and Human Services (BOH).

B. Emergency Shelter Grant Program (ESG) Block Grant

The Emergency Shelter Grants (ESG) program is funded through the Department of Housing and Urban Development's Office of Special Needs Assistance Programs. The ESG program is designed to be the first step in the Continuum of Care assistance by either preventing homelessness or by enabling homeless individuals and families to move toward independent living. Attachment B provides a detailed listing of ESG-funded projects in Fiscal Year 2004.

C. Community Development Block Grant (CDBG) Program

The Community Development Block Grant Program (CDBG) is a yearly allocation of funds to the City from the Department of Housing and Urban Development (HUD). The CDBG program requires that 70% of funds expended must benefit persons at 80% of the federal median poverty index or less.

CDBG is a flexible source of annual grant funds for local governments nationwide and can be utilized for a wide range of activities that best serve each city's own particular development priorities, provided that these projects (1) benefit low- and moderate-income families; (2) prevent or eliminate slums or blight; or (3) meet other urgent community development needs.

On an annual basis CDBG funds are utilized to help support the Social Services Grant program (\$250,000, see Attachment C for listing of funded agencies), and to support the Multi-Service Center for the Homeless.

II. OTHER FUNDING OPPORTUNITIES

There are other funding opportunities for homeless services available that the City either does not apply for, has applied for but not received, or do not fit the types of programs the City operates (note: a non-profit agency could apply for some of these funds to operate shelters or supportive service programs). Some examples of these are:

Proposition 46

On November 14, 2002, California voters approved Proposition 46, the Housing and Emergency Shelter Trust Fund Act of 2002, which is only one component of Proposition 46. Proposition 46 created a trust fund of \$2.1 billion to fund 21 types of housing programs in the areas of rental, homeownership, farm worker housing and other housing programs. It will fund programs administered by the State Department of Housing and Community Development and the California Housing Finance Agency. Proposition 46 delivers different categories of funding. *At present the City is not receiving funds in any of these categories as we must have site control for a minimum of eight months prior to application.*

Emergency Food and Shelter Program

The Emergency Food and Shelter Program (EFSP) were established in March of 1983, with the signing of the Job Stimulus Bill. The legislation created a National Board, chaired by the Federal Emergency Management Agency (FEMA). EFSP funds are used to target special emergency needs. The funding is used to supplement feeding and shelter program (emergency and transitional shelters) and rent/utility assistance efforts. The funding amount varies from year to year and is dependent on federal allocation levels. *The DHHS applied for funding under this category for the current year and*

Emergency Housing Assistance Program

The State Emergency Housing Assistance Program (EHAP) funds emergency and transitional housing programs. The funds are to assist housing programs with their operational, small capital costs and for the expansion of bed capacity/or supportive services offered to clients. The funding is administered through the State Department of Housing and Community Development. The funding amount varies from year to year and is dependent on federal allocation levels. *Funding is only available for operations, maintenance and rehabilitation of identified shelter sites.*

Los Angeles Homeless Services Authority

The Los Angeles Services Authority (LAHSA) is a joint powers agreement between the City of Los Angeles and the County of Los Angeles to oversee homeless services and the expenditure of homeless dollars countywide. LAHSA distributes between \$45 and \$60 million of public funds to about 80 agencies and more than 120 programs throughout the City and County of Los Angeles. *New Image Emergency Shelter has been providing LAHSA-funded emergency winter shelter beds since 1994 to Service Planning Area 8 (SPA 8), which incorporates the City of Long Beach. The current site is located at 1341 and 1351 West 14th Street, Long Beach and is open under a three-month facility use permit. Over the 10 years, the winter shelter program has provided Long Beach with an additional 200 beds from December to March each year.*

LAHSA oversees available funding for emergency programs (Winter Shelter Program, year-round Shelter and Services Programs). Non-profit agencies are eligible to apply for funding from LAHSA for services in Long Beach.

Interagency Council on Homelessness

The Interagency Council (IAC) on Homelessness is composed of 20 Federal departments and has been reconvened by President Bush to focus on Homelessness in America.

The IAC funds are to be utilized for significantly reducing the number of chronic homelessness. The IAC grant had a total of \$35 million for fiscal year 2003 coordinated between U.S. Department of Housing and Urban Development (HUD), Health and Human Services (HHS), Veterans Administration (VA). Currently there has not been appropriation of these funds for fiscal year 2004.

LBDHHS applied for funding under this category for this fiscal year, but was not granted the funds. Only 11 agencies nationwide were selected.

Mayors Fund for the Homeless

On September 14, 1990, the City Council approved an ordinance establishing the Mayor's Fund for the Homeless (Mayor's Fund). The purpose of the fund is to develop, implement and operate programs and activities to provide aid and assistance to homeless persons in Long Beach. Since 1992, a solicitation envelope for the Mayor's Fund has been mailed annually to Long Beach residents in the City's utility bill. The Mayor's Fund has raised \$395,619 in public contributions and \$110,113 in interest accrued to date. *The Homeless Services Advisory Committee (HSAC) oversee these funds and makes recommendations to the Mayor and City Council on the expenditure of the funding. The Mayor's Fund has supported nonprofit agency services, operational costs of the Multi-Service Center, development and annual printing of the Mayor's Fund envelope and printing of the Pocket Guide Resource Directory.*

How Funding Is Allocated

All of the above funds are allocated through a competitive Request for Proposal (RFP) process. Qualified non-profit organizations interested in enhancing the delivery of health and social services to the Long Beach community are encouraged to submit applications in accordance with the guidelines in the RFPs. A panel of individuals that do not have any conflict of interest with the applicants or funding source reviews the RFPs.

Members of the Board of Health and Human Services and the Homeless Services Advisory Committee oversee the review panels. The review committees often include both City appointed commissioners/committee members and outside non-City reviewers, e.g., Long Beach Homeless Coalition, composed of advocates for homeless, representatives from faith-based groups, and formerly homeless persons; Community Action Network (CAN), is an advocacy group composed of formerly homeless and currently homeless clients; the Interfaith Community Organization (ICO), and Community Development Advisory Commission members.

All of the funding committees are supported by staff of the Department of Health and Human Services (DHHS). DHHS has a long tradition of forging strong community-based partnerships, allowing for diverse community groups to come together and work towards achieving a common goal. This collaborative design allows for the development of shared visions and implementation of projects.

Attachment A – Continuum of Care Funding

The Continuum of Care (CoC) is authorized by Title IV, Subtitle C, of the McKinney-Vento Homeless Assistance Act of 1987. It is designed to promote the development of supportive housing and supportive services to assist homeless persons in the transition from homelessness and to enable them to live as independently as possible.

The following are the different types of CoC funding:

The **Support Housing Program (SHP)** program provides funding under the following approaches to supportive housing and/or supportive services.

Transitional Housing

Transitional housing is a type of supportive housing used to facilitate the movement of homeless individuals and families to permanent housing. Transitional housing provides homeless persons up to 24 months of housing and supportive services that enable them to live more independently. Transitional housing can be provided in one structure or several structures, at one site or in multiple structures at scattered sites.

Permanent Housing For Persons With Disabilities

Permanent housing for homeless persons with disabilities is another type of supportive housing. Permanent housing is long-term community-based housing and supportive services for homeless persons with disabilities. The intent of this type of supportive housing is to enable this special needs population to live as independently as possible in a permanent setting. HUD does have a limit on the number of units in this type of housing. The component allows for 16 or fewer persons in a single structure. If there are more than 16 people, then an explanation is required as to how local market conditions necessitate this size, and how neighborhood integration can be achieved for the residents. Permanent housing can be provided in apartments, single-family houses, duplexes, group homes, efficiency units or single-room occupancy rooms.

In the SHP statute, the Permanent Housing Persons With Disabilities (PHPWD) component is for assisting a homeless person with a disability who has at least one of the following characteristics:

- Considered disabled under Section 223 of the Social Security Act;
- Determined to have a physical, mental, or emotional impairment of long continued duration, impeding the ability to live independently, and of a nature that could be improved by more suitable housing;
- Having a developmental disability;
- Having AIDS or conditions arising from its etiological effects.

Safe Havens

A safe haven is a form of supportive housing in which a structure or a clearly identifiable portion of a structure: (1) serves hard-to-reach homeless persons with severe mental illnesses who are on the streets and have been unable or unwilling to participate in supportive services; (2) provides low demand, high tolerance 24-hour residence for an unspecified duration; (3) provides private or semi-private accommodations; (4) may provide for the common use of kitchen facilities, dining rooms, and bathrooms; and (5) in which overnight occupancy is limited to no more than 25 persons. A safe haven may also provide supportive services on a drop-in basis to eligible persons who are not residents.

A Safe Haven is a form of supportive housing that serves hard-to-reach homeless persons with severe mental illness who are on the street and have been unable or unwilling to participate in housing or supportive services. Safe Havens serve as a refuge for people who are homeless and have a serious mental illness.

Safe Havens serve as a portal of entry providing basic needs (such as food, showers, clothing), as well as a safe and decent residential alternative for homeless people with severe mental illness who need time to adjust to life off the streets and to develop a willingness and trust to accept services in order to transition to permanent housing.

Due to the special needs of the participants of the Safe Haven projects there are some specific characteristics that contribute to the success of a Safe Haven facility, such as intensive and skilled outreach to this hard-to-reach population; engagement at a pace comfortable for the participant; intake/assessment, understanding that it is this consumer's inability to get through the intake process at traditional shelters that make them candidates for Safe Havens; supportive service delivery at the participant's pace.

Supportive Services Only

The supportive services only (SSO) component, projects address the service needs of homeless persons. Projects are classified in this component only if the project sponsor is not also providing housing to the same persons receiving the services. SSO projects may have a structure or structures at a central site or multiple structures at scattered sites where services are delivered. Projects may also be operated independent of structures, e.g., street outreach or mobile vans for health care. SSO projects address the service needs of homeless persons. Projects are classified as this component only if the project sponsor is not also providing housing to the same persons receiving the services.

Innovative Supportive Housing

The innovative supportive housing component enables the applicant to design a program that is outside the scope of the other components. Projects under this

component must be innovative as determined by HUD or they will be rejected. In particular, a proposed innovative project must demonstrate that it represents a distinctively different approach when viewed within its geographic area, is a sensible model for others, and can be replicated elsewhere. An applicant should not propose a project under this component unless a compelling case is made that these criteria can be met.

Shelter Plus Care (S+C)

The Shelter Plus Care Program (S+C) provides rental assistance for hard-to-serve homeless persons with disabilities in connection with supportive services funded from sources outside the program. The S+C program is designed to provide permanent housing and supportive services on a long-term basis for homeless persons with disabilities, (primarily those with serious mental illness, chronic problems with alcohol and/or drugs, and acquired immunodeficiency syndrome (AIDS) or related diseases). The program allows for a variety of housing choices, and a range of supportive services funded by other sources, in response to the needs of the hard-to-reach homeless population with disabilities.

Program grants are used for the provision of rental assistance payments through four components:

1. Tenant-based Rental Assistance (TRA);
2. Sponsor-based Rental Assistance (SRA);
3. Project-based Rental Assistance
4. Section 8 Moderate Rehabilitation Program for Single Room Occupancy (SRO) Dwellings.

What CoC funding Can Not Be Used For

CoC funding may not be used for emergency shelters or permanent housing for non-disabled persons. In addition, SHP funding may not be used to support an existing project except to: fund the expanded portion of the project that will increase services or the number of persons served; bring facilities up to a level that meets State and local government health and safety standards; replace nonrenewable funding from private, Federal, or other sources not under the control of the State or local government; or, renew grants eligible for continued funding under the renewal provisions of the SHP program.

Attachment B – Emergency Shelter Grant Program

Specific needs for homeless services for 2003-2005 were identified following; testimony on needs of homeless persons provided to the Board of Health and Human Services at their hearing, to the Homeless Services Advisory Committee at their hearings, and through a review of related information concerning homeless services, resources and needs in the community.

The use of Emergency Shelter Grant (ESG) funds is restricted by federal regulations (24 CFR Part 576). The purpose of ESG is to improve the quality and number of emergency homeless shelters by funding emergency shelter and related social services. This program is designed to be the first step in a continuum of assistance to enable homeless individuals and families to move toward independent living as well as to prevent homelessness.

The primary objectives of the ESG program are in the areas of Operations, Essential Services, and Prevention Services for the homeless:

Operations:

- Help improve the quality of emergency shelters for the homeless;
- Assist agencies to meet the cost of operating shelters;

Essential Services:

- Assist agencies in providing essential social services linked to emergency housing; and

Prevention Services:

- Assist agencies with activities or programs designed to prevent the incidence of homelessness.

The ESG regulations define emergency shelter as any facility, the primary purpose of which is to provide temporary or transitional shelter for the homeless in general or for specific populations of the homeless.

Homeless prevention is defined as activities or programs designed to prevent the incidence of homelessness, including (but not limited to): (1) Short-term subsidies to defray rent and utility arrearages for families that have received eviction or utility termination notices; (2) Security deposits or first month's rent to permit a homeless family to move into its own apartment; (3) Mediation programs for landlord-tenant disputes; (4) Legal services programs for the representation of indigent tenants in eviction proceedings; (5) Payments to prevent foreclosure on a home; and (6) Other innovative programs and activities designed to prevent the incidence of homelessness.

Attachment C - Social Services Grant Program

The Social Services Grant Program was established in 1987 by the Long Beach City Council to encourage the development of innovative programs to address unmet and emerging social service needs of low-income Long Beach residents. The program also serves to supplement critical health and social services for underserved populations that are presently under-funded and/or inadequate in scope, including homeless people. The Social Services Grant Program incorporates City of Long Beach funds and federal Emergency Shelter Grants program funds.

Grant proposals are reviewed by members of the Board of Health and Human Services (Homeless Services Advisory-Committee will also review proposals for homeless services). Funding recommendations are then made to the City Council. Qualified non-profit organizations interested in enhancing the delivery of health and social services to the Long Beach community are encouraged to submit applications in accordance with the guidelines in this announcement.
